

Supplier : Power Play
Type: Separate junior and senior play structure
Colour: Primary colour palette

Elements

- 1 Rubber Safety Surfacing: 100mm depth multi-coloured / patterned rubber safety surfacing provides a thin CSA compliant fall surface. The required depth is 100mm and the surface is able to follow the slope of the site.
- 2 New Play Structure: a new and updated play structure can provide a wider variety of play value.
- 3 New Concrete walkway: Walkways should be widened in some areas to comply with AODA minimum accessibility requirements.
- 4 Recycled plastic timber board at sandbox: colourful and durable recycled plastic timber can replace the top board at the sandbox.
- 5 Repaired metal picket fence
